

The mechanism locks in place to create a secure lifting point on the road plate.

The Safer Way to Lift Road Plates

Lock-N-Lift Road Plate Lifter

The Lock-N-Lift Road Plate Lifter* sets the benchmark for safe road plate handling. Its innovative design eliminates the need to place hands, feet or tools under the plate. The lifting tool locks securely into a weld-in receiver plate, allowing chains, hooks or shackles to connect directly for safe lifting.
